

May 17, 2020

To Our Guests,

On behalf of the hundreds of restaurants across the state of Rhode Island please let us begin by saying we deeply miss seeing you. Our daily lives have changed so much in the last two months since restaurants in our state were ordered closed for dining in. The restaurant business is not simply about the meal, wine or your favorite cocktail. It is more about romance, family, friendships, creating memories, and the ability to bring us all together as a community.

Restaurants support a tremendous amount of small, as well as large, businesses through our daily needs. Up to 90% of the money independent restaurants earn goes right back into our communities, through payroll, vendors, rent and many more services. We know how much our restaurants are loved in Rhode Island as we have the most restaurants per capita nationwide. We offer a diverse, vibrant and delicious culinary scene that has become world renowned.

The restaurant industry has been one of the most severely impacted by the closures related to Covid-19. We have done all that has been asked of us to help flatten the curve. Many of us are now doing all we can to get by while helping our team members and our community at the same time. Takeout, delivery, and outdoor seating with reduced capacities will not sustain us for long.

We are one of the most regulated industries for health standards and our goal has always been to exceed those standards for our guests. For this reason, we are asking you our guests to support us in our request for opening indoor dining by June 1, 2020. The very existence of what our restaurant community will look like depends on us being more creative than ever now. However, we must be allowed this opportunity to serve you to the best of our abilities within the new restrictions from the Department of Health.

All of us love what we do. The memories we have shared and created with all of you is the core of our being. We are ready to welcome you back in a safe, comfortable, enjoyable and delicious way.

Sincerely,

The Ocean State Coalition
